PROJECTS

MovieCraze

Full stack React app with token authentication, password hashing, and input validation. Utilizes Redux for state management. Users can edit user data as well as view movies, movie details and edit a list of their favorites. Check out my code: [Frontend](#) | [Backend](#) | [Live Site](#)

Meet App

Serverless React app using AWS Lambda and Google API. Created using test driven development. Utilizes Jest, Enzyme, Cucumber and Atatus for testing. Users can view events, filter by city and see event details. Check out my code: [GitHub](#)
